Objective

Passionate Android and Java developer with hands-on experience in building 4 Android applications, including backend integration using Spring Boot and REST APIs. Eager to contribute and grow in a software development role.

Technical Skills

- **Programming Languages:** Java, XML, SQL

- **Frameworks/Technologies:** Android SDK, Spring Boot, Retrofit, Firebase

- **Tools**: Android Studio, Git, Postman, Maven,vs Code, My Sql, PostgreSql

- **Others:** REST APIs, JSON, MVC/MVVM, GitHub

Projects (https://soumen-android.netlify.app/)

E-Commerce App(ListOnGo)*

Tech Stack: Android (Java), Spring Boot, PostgreSql

Developed a smart shopping list Android app with real-time CRUD integration for managing and syncing lists across devices**.**

Weather App(WeatherApp)

Tech Stack: Android (Java), Open Weather Api, Retrofit

Built a real-time weather app that fetches and displays current weather data using the OpenWeatherMap API based on user input.

Task Management App(To-Do List)

Tech Stack: Android (Java), Spring Boot

Designed and implemented a Spring Boot-based REST API for managing to-do tasks with full CRUD functionality.

Qr And Scanner(OnlyQR)

Tech Stack: Android (Java)

Created a lightweight Android app for scanning and generating QR codes using the ZXing third-party library.

Education

BCA| Jis University | 2023 – 2026 | CGPA: 7.59*

Certifications

- **Android Development** – With help of Youtube And AI

- **Java Programming** – Udemy

Soft Skills

- Teamwork, Problem-solving, Communication, Time Management

Languages

- Bengali(10), English(7), Hindi(8)
